RE: N-95 mask donation

Mr. Larry Lopes and the Men of Omega Psi Phi Fraternity, Incorporated Phi Iota Chapter:

I am writing this letter to express my gratitude for the several boxes of N-95 masks that my co-worker Dr. Brian P. Winston dropped off. We are very appreciative, as many members of our community have been significantly affected at disproportionately higher rates than other areas of the country.

Dr. Winston has served our Hopi Indian community for the past three years and he has served the Nation with distinction and compassion.

I have consistently watched his contributions and clinical work and been impressed with his commitment for this wonderful organization. I am honored to work with so many notable members of our health care organization, and I am fortunate to have worked so closely with Dr. Winston, as a consummate professional who dedicated his time and efforts to improving the health care in one of the more austere environments that is full of our time honored Native tradition.

I am sure that you and your members of Omega Psi Phi will continue to work hard to improve your community and the lives of everyone that you touch. Dr. Brian P. Winston emulates the proud tradition of your organization, undoubtedly. The Hopi Health Care Center sincerely appreciates the donation of N-95 masks to support our mission for the Hopi people.

Respectfully,

A handwritten signature in black ink, appearing to read "Darren Vicenti, MD", written over a horizontal line.

Dr. Darren Vicenti
